- JavaScript basic

PROFESSIONAL SUMMARY

Adaptable web developer with expertise in Node.js and RESTful APIs. Collaborate effectively with frontend developers and product managers to deliver efficient and reliable backend solutions. Strong proficiency in JavaScript and a proactive approach to problem-solving.

PROJECTS

1. Capturepoint | ⊕ | ◉

React | Bootstrap | Node.js | Express | Mongodb | OAuth | Bcrypt | JWT

- Implemented user registration and authentication functionality, including Google OAuth.
- Designed features for product search, sorting, filtering, adding to the cart, booking orders, and viewing order history.
- Created an admin panel for performing CRUD operations on products in stock and managing orders.
- Crafted the user-friendly front-end interface.
- Successfully completed this individual project in a span of 10 days.

2. StylistaBook | ⊕ | ◉

Node | Express | MongoDB | Jwt | Bootstrap | bcrypt

- Developed an appointment booking system for hair and beauty salon specialists.
- Optimized client scheduling and elevated operational efficiency.
- Created API routes and functionality for users to search and book appointments with their preferred stylists or salons.
- Designed and implemented a user-friendly stylist dashboard that enables stylists to manage appointments effectively.
- Implemented database integration with MongoDB for efficient storage and retrieval of appointment data.
